Experience the perfect blend of luxury and efficiency with our new grey towel heater. Engineered for even heat distribution through advanced liquid circulation, it offers sun-like warmth via infrared heating. Designed with energy-saving features and accumulation heating, it ensures maximum efficiency. Enjoy silent operation, soft-touch controls, and a sleek, compact design—making it the perfect modern upgrade for your bathroom, where comfort meets technology.

- **Weekly Program Function:** Customize your heating schedule for maximum convenience and efficiency.
- **Pre-Set and Custom Programs:** Access optimized heating programs easily or create your own.
- **Versatile Heating Options:** Choose from Comfort, Eco, or Anti-Frost modes to adapt your heating to any situation—whether it's for maximum comfort, energy savings, or frost protection.
- **Open Window Detection:** Prevent energy waste with automatic heating shutdown when an open window is detected.
- **Timer Function:** Set the heater to shut off automatically, ensuring you never use more energy than necessary.
- **IP 24 Water Protection:** Get protected against water splashes for added safety.
- **Overheating and Anti-Frost Protection:** Keep your home safe with built-in overheating and anti-frost protection.
- **Electronic Thermoregulator:** Enjoy precise temperature control to match your preferences at any time.
- **LED Display & Soft-Touch Controls:** Experience smooth and intuitive control with a user-friendly LED display and soft-touch key control.
