

FLOOR STANDING FAN  
HEATERS

HL-213V

TIN Code	421800
Net weight	0.87 kg
Maximum power	2000 W
Thermo regulator	mechanical
For room up to	34-39 m <sup>3</sup>
Heating area	13-16 m <sup>2</sup>
Height	0.245 m
Width	0.227 m
Length	0.120 m
Mounting	Vertical

- Heating element - resistive wire
- Compact and light weight
- Light indicator
- Power cord: 1.5 m
- **Energy saving features**
- Adjustable thermoregulator
- 36% seasonal energy efficiency out of max 40%
- Two power settings: 1000 W / 2000 W
- **Security features**
- Anti-frost protection
- Overheating protection

Fan heaters are among the most commonly used heating appliances due to their small size and compact design, which make them easy to carry and convenient to use in all kinds of rooms. TESI offers both models with resistive wire and PTC heating elements. PTC heating element is made of metallized ceramic material. The ceramic heating element produces a powerful infrared heat radiation and air convection. The infrared radiation heats up the surrounding walls, objects and furniture, which then emit heat to the interior of the room. These appliances are cost-efficient due to the ceramic's thermal properties allowing material resistance change according to ambient temperature changes. This means that an appliance with rated power 1800 W, in case of reduction of the air outflow (or a defective turbine) self-regulates the output power reducing it to 145-185W depending on the ambient temperature.
